Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6, 10, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Whitecar.

3. Claims 1-3 and 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Raz. Raz discloses the claimed invention including a third weight sensor mounted to the bulkhead (Col.4, lines 46-57). Regarding claim 3, the examiner notes that since the load cell is mounted to the middle tine, or bulkhead, then it is mounted to the third roller via the bulkhead. Although not expressly shown, the electronic load cells must have a microprocessor controller to sum up the outputs of the different load cells, and there must be a display for a human to see.

Conclusion

4. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Although it is generally known to mount

strain gages to axle rods of other types of vehicles, there appears to be no motive in the art of record to modify a hand truck to mount strain sensors to the axle of the rollers of the hand trucks.
